I talked to Mark about the GN letters going to parties that used CES to transport their hazardous substances to another disposal location. Your theory was that the tanker trucks were cleaned at the CES facility. Do we have any evidence that CES had a tank washing facility there or any other evidence that the tanker trucks were cleaned at the CES facility? Without this link, we cannot send letters to those parties as this time.

Gary-if you know by the Site layout, let me know.

Amy
